

Weekly Report

Pingping Shang

2013.6.24~2013.6.30

Work in this week

- 1 Read some papers visualizing categorical data, including parallel sets, ordering dimension pairs, dicon, catedoc, clustering data with entropy, feature selection and so on.

These papers either provide a new visualization methods or combine some existing algorithms and maybe I can imitate the later one.

- 2 Do a little improvement in my simple system.

Plan for next week

Implement one method to make the simple system completeness and try to improve it.
